

SCANVAEGT BN2010

Automatic top labelling line

The Scanvaegt BN2010 is designed for applying pre-printed labels to a wide range of products, such as thermoformed trays and after packaging machines. This flexible solution can be equipped with a TTR printer that can be integrated directly into your current production environment.

It is designed for seamless integration into packaging lines and has variable speed control to suit your existing setup, delivering optimal results on flat-bottomed products.

Key benefits of Scanvaegt BN2010

- Labels products at speeds up to 250 items / min.
- Solid construction in stainless steel
- Easy label change during production
- Programmable touch screen with 40 label recipes
- Adjustment of product height and label position
- Running direction: Left-Right or Right-Left
- Suitable for many different box types and sizes
- High flexibility and seamless integration

Price example

Product	Price (EUR)
Scanvaegt BN2010	20.692
ScanCare Service Agreement	2.569
Installation	1.005
Total	24.266

* The installation price quoted in this sheet is based on a 1-day daily rate, Monday-Friday from 8am-4pm.

** If the product sizes, labels or belt differ from our standard specifications, additional costs may occur.

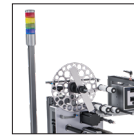

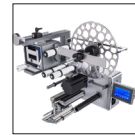

*** The prices quoted in this sheet do not take annual price changes into account.

Scope of delivery

- 1 x Conveyor belt
- 1 x Label applicator with tongue and fork photo sensors
- 1 x 4.3" display with brackets
- 1 x Belt speed adjustment and start/stop
- 1 x Product tracing by reflective photocell

Optional configuration

- Full print for the entire label
- Date and batch printing at high speed
- Low label warning
- Central Label Management. Codesoft, Nice Label, Bartender, ScanPlant

Programmable touchscreen

Our intelligent touchscreen with memory eliminates the need for reprogramming at every label change. Switch quickly between jobs by simply selecting a saved program. No manual parameter adjustments required.

Solid construction

The Scanvaegt BN2010 is built in stainless steel for reliable 24/7 industrial operation and long service life. Adjustable guides come as standard, ensuring precise label application across different product types.

Quick label adjustment

Label placement is easily adjusted using the dispenser handwheels. Clear position indicators allow operators to reset quickly, ensuring fast and efficient product changeovers.

Efficiency and flexibility

You can customize the line to handle a wide range of products and sizes, including labels applied down the side of the product. If you need to apply multiple labels, additional dispensers can easily be integrated into the line.

ScanCare service agreement

Keep your equipment running at peak performance while maintaining predictable service costs. The ScanCare Standard Service Agreement includes 1–2 annual preventive maintenance inspections, unlimited 24/7 remote support, and on-site repairs during business hours (8:00–16:00) with an 8-hour response time. All technician hours, travel, and spare parts are covered. Conveyor belts are invoiced separately (installation included).

Scanvaegt labels

In close cooperation with Scanvaegt Labels, we offer a wide range of label solutions, including multicolored labels, linerless labels, thermal labels, reverse-side printed adhesive labels, blank labels, and bottle labels. All labels are produced with advanced technical expertise to ensure reliable performance, high efficiency, and maximum uptime.
