CashGuard

Note Recycler R4

Secure storage of your bank notes

Secure the checkouts
The high level of security provided by Note Recycler R4 allows you to keep an over-night storage of cash in the checkout. Move cash from the note recycler to the Backoffice safe at your own convenience. The Notes are already in the safe!

Note Recycler R4 protects the notes from both robbery and pilfering and always returns correct change.

Let Note Recycler R4 give you a safer store environment with lower risk of both robbery and threats.

Allows a Wider Service Range
The high capacity and security level offered by Note Recycler R4 makes it ideal for the note volumes circulating in activities like cash back, bank-in-store and pools/lottery.

High Speed and High Capacity
The multislot design brings advantages in performance, speed as well as capacity.

It only takes 0,1 second for the note recycler to make a denomination recognition, which gives a performance speed of more than 2 notes a second in throughput, in both directions.

All notes are recycled, and notes are accepted in all 4 orientations, with a very high acceptance rate valid notes. A capacity of 4 slots can hold up to 800 notes in up to 8 denominations.

High Reliability
Note Recycler R4 use the same Note Cassette technology as Note Recycler S and H, causing very few jams.

The customer notes are fed into the note recycler by the cashier.
Dispense of change in notes is made quick and automatic.

Closed and Safe
The system can be set to keep all levels of denomination balanced, and by doing so reduce the need for replenishment or manual change of notes.
Once the notes are fed into the note recycler by the cashier, they are no longer exposed in the store. The cash handling becomes closed and safe.

Save Time
A CashGuard system gives you complete control of the cash amount in all point-of-sales, at all times. Note Recycler R4 puts an end to time-consuming reconciliation.

Features
- 4-slot capacity of up to 8 denominations
- 200 notes per slot
- Quick note identification
- Compact design for easier placement (fits in a 60 cm desk)
- Designed for EN 1143-1 Grade 2
- Used in combination with Coin Recycler
- Low maintenance cost

Note Recycler R4
