PM43 Industrial Printer

Overview

Feedback

Programmable PM series smart printers offer you reliable performance for uptime assurance, quick deployment and integration, and the fastest throughput in their class –: no PC required. The PM series are available in a variety of enclosure sizes and door types to fit your exact application.

- Ready for the future, with IPv6 support, plus CCX and Wi-Fi certifications.
- Run sophisticated apps right in the printer with industry-leading Honeywell Smart Printing supporting C#.
- Fast printing speed of up to 12 inches per second.
- Comprehensive printer command language support, including ZSim2, makes upgrading easy.
- Large color, multilingual, tamperproof touchscreen or icon user interface.

The PM series Mid-Range Industrial Printers deliver proven reliability, fast drop-in deployment and integration, and advanced connectivity to maximize your uptime. They're ideal for applications in distribution centers, warehouses, manufacturing operations, and transportation centers. The PM series was designed for easy integration and fast deployment. Minimize workforce training and device support needs with intuitive features like a vibrant color touchscreen or intuitive icon user interface.

Notifications are displayed right on screen, and the interface can be locked down to eliminate tampering. And with the broadest connectivity options in their class –: including Wi-Fi and Cisco CCX certifications, plus additional Bluetooth®: connectivity –: PM series quickly interface with virtually any IPv4 or IPv6 network. PM printers offer outstanding performance in harsh environments thanks to a rugged metal enclosure and the top print speed in their class at 304 mm/s (12 ips). Beyond the productivity of speed, PM printers also enable you to work smarter by reducing labeling errors and increasing process efficiency. Plus, in-printer apps can directly control other devices such as scanners, scales, keyboard and other peripherals –: without the need for an attached computer.
